Biyografi

Professor Karadag initiated his academic journey in 1993 as a Research Assistant within the Chemistry Department at the Science and Letters Faculty of Ondokuz Mayıs University. He completed his military duties in 2003 as a reserve officer, following his doctoral degree in 2001, and subsequently served as a Research Assistant at Ondokuz Mayıs University for some time. In 2004, he was appointed as an Assistant Professor at the Science and Letters Faculty of Tokat Gaziosmanpaşa University. He advanced to Associate Professor in 2007 and to Full Professor in 2013. Between 2017 and 2019, he headed the Faculty of Science at Bartın University. From 2019 to 2023, Professor Karadag held the position of Rector at Yozgat Bozok University. He started working at Bursa Uludağ University, Faculty of Sciences and Letters, Department of Chemistry on January 2, 2025.

Throughout his career, Professor Karadag has guided eleven master's and six doctoral candidates to the completion of their theses, and he is currently supervising two doctoral theses. His research expertise encompasses coordination polymers, inclusion compounds, clathrate structures, ionic liquids, and green chemistry. He has authored 93 articles in these areas, featured in SCI and SCI-expanded journals, contributed 3 articles to other international peer-reviewed journals, and 2 to domestic peer-reviewed journals. Additionally, he has presented 85 studies at national and international scientific meetings, which have been included in the proceedings, and 2 studies at international meetings have been published as abstracts in international journals. Dr. Karadag holds 4 patents related to the biological activities of various compounds and has trademark registrations for "TOREX" and a hemp-based "NESHE" brand for cleaning and cosmetic products. His publication record includes one online book, one edited book, and six book chapters.

As the project manager, Dr. Karadag led the "Cost-Effective Pilot Scale Production of Bioethanol" research project from March 2018 to 2020, a collaboration between Bartın University and the Government College Lahore University in Pakistan, under the Mevlana Project-Based International Exchange Program. In the scope of these studies, research was conducted for 15 days at the University of Lahore in Pakistan. He also conducted a three-month study on ionic liquids at the University of Alabama, USA.

In recent years, Professor Karadag has focused on developing sustainable and high-value-added products, such as food, medicine, cosmetics, paper, textiles, and bioplastics from Hemp Biomass. His current research interests include the green synthesis of metal nanoparticles for biological applications and the production of bioethanol and biobüthanol as a cost-effective, environmentally friendly, and efficient strategic energy resource

Professor Karadag is married and a father to two children.
