### Biography

I graduated with honors from Ondokuz Mayıs University in 1998 with a BS in Civil Engineering. I subsequently joined the Civil Engineering Department at the Karadeniz Technical University (KTÜ) as an M.S student in the Reinforced Concrete Division. While continuing my MS education in Structural Engineering in 2001, I joined K.T.Ü Gumushane Engineering Faculty Civil Engineering Department as Lecturer. After finished M.S, I attended the same University to pursue a Ph.D. in Civil/Structural Engineering. There I conducted research on a variety of topics. I finished my Ph.D. in April 2005. I pursued computational simulation research on fluid container tanks and building structures, focusing in particular on seismic behavior considering fluid-structure and soil-structure interaction. I also explored a number of other research areas, including the seismic performance of reinforced concrete, masonry and wooden structures, minarets, response spectra, etc., I am deemed worthy of the award "Prof.Dr.Dr.Hc Önder ÖZTUNALI" by the scientific committee of Kültür University in 2008. I also conducted researches about the deep foundation as an Adjunct Research Professor at The University of Western Ontario London, CANADA. In fall 2010, I joined the Engineering Faculty at Bursa Uludag University, where I have since been.
